### Course description

This course aims to provide the students with a survey of communist regimes and post-communist evolutions in Eastern Europe, from WWII up to the present day. Since the region transformed itself a lot in the past twenty years, for instance it changed from 9 nation-states before 1989 to 27 today, we will not cover the entire range of cases in this course. Instead, we will focus in detail on a few cases, East Central Europe, the Balkans, and 3 post-Soviet republics—Ukraine, Belarus and Moldova, and will address the broader themes specific to comparative politics.

The course is divided into 3 sections.

- First, we will delve into the core characteristics and differences of the communist regimes--this way, for instance, you will understand why I, as a Romanian, have a rather negative perspective on what Communism meant, while someone from former Czechoslovakia, Poland, or Hungary may (?) spend a moment trying to assess the regime with a positive eye. In addition, we will consider the 1989 *events*, where various terms such as 'transitions from below', 'transitions from above', 'revolutions', 'transformation' will be used to distinguish between various regime changes in the region.
- The second part will cover in detail a couple of regional patters that we notice across the region. Here we will examine the political and economic developments in particular cases, with the goal of assessing differences within the post-communist region. We will notice that, despite the unique communist legacies,

the region differs greatly in terms of “*successful*” economic, political, and social transformations.

- The last part is focused on **thematic** issues across the regions that are important to comparative politics more broadly. Major themes covered in the last part will consist of EU accession, democratization and political participation, economic development, institutional design and parties, and fringe politics.
